

## **GUN ANNOUNCE BRAND NEW MINI ALBUM**

**'Popkiller' – released April 5<sup>th</sup>**

**Gun have announced the release of a brand new mini-album entitled 'Popkiller', available from April 5<sup>th</sup>. It salutes a triumphant return for the cult Glaswegian rockers, who helped shape guitar rock of the 90s with a series of hugely influential albums including Taking On The World, Gallus, and Swagger.**

'Popkiller' is packed with a typically strident sound. Its five songs showcase Gun's distinctive brand of towering guitars and powerful hooks – the bullets that formed such a potent sonic arsenal a decade ago. But Gun's sound has been given room to breathe. Smatterings of synths and immaculate mastering at Abbey Road add a new vibrance to their legendary sound, a contemporary sheen to all that makes rock classic.

Gun reformed in 2008 to a wave of excitement from both the media and the music-loving public. 'Popkiller' features the first material released since the reformation, and arrives on the back of a string of blistering performances during their recent UK tour.

The new look band features original members Giuliano Gizzi (guitar) and Dante Gizzi (bass) who are joined by Gordon McNeil (drums) and former Little Angels frontman, Toby Jepson. 'Popkiller' is a bold and knowingly assured return to the musical stage, and unveils a rejuvenated band heading with breakneck speed to the summit of the UK's classic rock scene.
